

Changes coming to Windsor Senior Computer users group

In our efforts to continue to be a technical/computer resource for the Windsor Senior Recreation Center, we are going to try some different things. We think it will still be awhile before we can meet in person at the Senior Center, so we will be keeping our monthly second Mondays as a Zoom meeting. Because of the ongoing Shelter in Place, getting speakers for our meetings has become increasingly more difficult. Many of our volunteer speakers are not comfortable with doing a Zoom meeting. To keep our meetings informative and interesting, while keeping us up-to-date with the latest in technology, we thought we would change a few things.

Our **Second Monday of the month, 1 PM**, meetings will include the following:

- ◆ **Jim** will be our meeting moderator: general Q/A, introducing speakers, any new news, general updates etc
- ◆ **Erin** will give us updates about the Senior Recreation Center, general Q/A about the center and its events
- ◆ **Ross** will discuss his Comments from Ross article from the newsletter, and any issues he thinks we should know about
- ◆ **Andrea** will discuss article(s) from the newsletter, or issues she thinks we should know about
- ◆ **Jim\Andrea** will give tips\tricks on Windows 10, Android and iPhones and tablets.
- ◆ There will be Q/A throughout the Zoom meeting. We hope you will all write out your questions in the Zoom chat (which we will explain how to do), so we can get you answers.
- ◆ **Jim** will close the meeting

The order in which these will take place is flexible and will not necessarily be the same each meeting, but we do hope to include each one of the above items in every meeting. We hope this new format will continue to keep us informed and answer your technology questions.

**For Drop-In computer help, 2-4 PM ----Dates for 2021:
Monday, January 25, February 22, March 22, April 26, May
will be the third Monday the 17th because the Senior
center will be closed on the 4th Monday, and June 28.**

(Normally the fourth Monday of the month)

We are hoping to have **BOTH** an **online session** and an **in-person session** from 2-4. We will keep our present system of using **TeamViewer to remote into your devices**. To set up your **remote appointment, you will need to send an email to us** following the Information for how to setup a remote session for Drop-In help from our website: <http://donna.members.sonic.net/TeamViewer support 2012-1-2020.pdf>

The **In-Person Drop-In help** will be held from 2-4 at the Windsor Senior Center **OUTSIDE** at the picnic tables. These sessions will be **weather permitting**, one-on-one, wearing masks, and observing social distancing and sanitizing policies as much as possible. Jim and Andrea will be doing these sessions, one remotely and one in person at the Senior Center. **To set up your in-person appointment:**

- **Call the Windsor Senior Center and register: 707-838-1250.**
- **Email Erin:** Erin Stroud estroud@townofwindsor.com
- **Or register online:** <http://bit.ly/WSRCONlineRegistration>

On the day of your appointment, you will check-in at the senior center front desk, mask in place, then remain in your car until we come and get you.

Please note some problems can be resolved with a remote session and some will require an in-person session. If we think your problem would be better addressed in one or the other from what you have registered for, we may contact you about switching. We are still finding our way through these pandemic restrictions and hope to find what works best for all of us.

Articles for January

a) **Report: Windows' Mail, Calendar apps could be replaced by a web-based client**, by Mark Hachman, 01.04.2021.

"Near the end of this year, the Mail and Calendar apps within Windows 10 could be phased out for a new, web-centric version of Outlook. Right now, email and calendaring services are reproduced across several apps within Windows."

There are the separate Mail and Calendar apps built within Windows, the traditional Outlook app in Microsoft 365 suite, and Outlook web client, as well as Outlook versions for Mac, iOS and Android.

"'Project Monarch' could consolidate the numerous Outlook apps," and "try to combine the best features of Outlook's native app (part of Microsoft 365), with more of the flexibility that the web app's UI allows....it appears Microsoft may want 'Monarch' eventually to replace the native

a) Office app."

www.pcworld.com/article/3602650/report-windows-mail-calendar-apps-could-be-replaced

b) **Fine, let 2021 be the year the headphone jack dies on phones** by Andrew Martonik, 12.23.2020. "I hate to break it to you, but the headphone jack is going away. Companies making phones that cost more than \$500 have realized they can remove a headphone jack and nobody will complain enough to not buy the phone. - everything is Bluetooth now. People obviously complained about the loss of the headphone jack at first, but they don't seem to care anymore. It's going to take a very long time for the 3.5 mm headphone plug to disappear, so even if phones eliminate the port, there will still be considerable demand for standard wired headphones. In the meantime, there's always an adapter!"

c) How to lock down your Microsoft account and keep it safe from outside attackers by Ed Bott, 01.05.2021. "What's your most valuable online account, the one most deserving of protection? If you use a Microsoft account to sign in to a Windows PC, that account and its associated email address should be the one you guard most jealously. That's especially true if you use that Microsoft account for OneDrive storage and Office 365 documents." He lists "7 steps to take to help you lock that account down so it's safe from online attacks." If you use a Microsoft account, you should review this article. www.zdnet.com/article/how-to-lock-down-your-microsoft-account

d) The best Windows backup software by Jon L. Jacobi, 12.28.2020. "It would be nice if Microsoft itself provided Windows users with something like Apple's Time Machine: an effective, set-it-and-forget-it, total system recovery and backup solution that requires little interaction or thought on the user's part. Instead, Microsoft delivers a mishmash of restore points, recovery discs, file backup, and even the un-retired System Backup (Windows 7)." This article includes reviews of a variety of vendors as well as tips on what to look for in backup software. Their pick for best overall backup software is Acronis True Image 2021. www.pcworld.com/article/3201971/best-windows-backup-software

e) Microsoft plans 'sweeping' design changes to show that Windows 'is back' by Liam Tung, 01.05.2021. "As ZDNet's Mary Jo Foley has noted, Microsoft has a few major changes happening to Windows 10 development in the pipeline over the next two years. It might not release a Windows 10 21H1 feature update as it has in the spring of each year... the 21H2 Windows 10 feature update will be more dramatic than the usual feature update and will include a UI (user interface) refresh across a number of Windows components and apps," including the Start Menu, Action Center, and some bundled Microsoft apps. www.zdnet.com/article/microsoft-plans-sweeping-design-changes

f) Get a head start on defending against tax scams by Malwarebytes Labs, 12.08.2020. "...a prolific tax scammer is on their way to jail for 20 years." The article gives the details of the scam that called from "centers in India, splitting their time between pretending to be the IRS and the US Immigration Services." The article has links to tips and examples of tax scam emails. Please read the article to keep up-to-date on best practices. blog.malwarebytes.com/cybercrime/social-engineering-cybercrime/2020/12/get-a-head-start-on-defending-against-tax-scams

Comments from Ross
Saving your address book: How many of you have backed up the address book in your email account? If you use an email client like Thunderbird or Sonic's web-mail program, you can EXPORT your addresses to a spreadsheet file, then back up this file to an external drive for safekeeping. Open your Address book and look for the word Export, it may be under a menu item entitled Tools. In Sonic for example, in my Address book there is a button that says Export. Clicking it allows me to save the file as a spreadsheet and then I can back up that file or import my addresses into another email program. You can also use the file in conjunction with your word processing program to create labels or envelopes.
